John Christensen's take on Jim Hines is as unenthusiastic as mine.

And this man's meant to be one of the best tax professors in the world?

His core assumption is a simple one;

Let's assume I'm right

The reality is that the rest of us should read this as:

Let's presume I'm from the right

And from then on we should note that he's about as objective as Margaret Thatcher ever was on any issue she discussed.
