

## 80 countries in a weekend

Published: January 13, 2026, 6:39 pm

I looked at my blog stats last night, which I generally think a bit of a waste of time. But I noticed that over the day, and some of Sunday (traffic being slow on a Bank Holiday Monday) that visitors from 80 jurisdictions had visited the site.

Sure, half were from the UK, but I admit I find the spread amazing.

A decade ago no one could really have imagined this possibility to achieve global reach for an idea. Blogging has its ups and downs. This is one of its attractions.

For the curious this rather poor screen shot shows where people came from.
