The [FT reports](#):

*Amazon.com says it is selling more e-books for its Kindle electronic reading device than paperback and hardback print editions combined, helping its book business to see its strongest growth in more than a decade.*

I'm amazed: on the UK site the Kindle book is often more than what I might call the real thing.

But, I'm no technophobe. I haven't embraced this yet. So this is an off the usual topic request: is the Kindle worth having?
