### Say you want country-by-country reporting

Published: January 12, 2026, 11:23 pm

---

ONE have launched a **petition** calling on European leaders to stand up to extractive industry pressure and support a strong country-by-country reporting law the petition is available — in [English](#), [French](#) and [German](#) — **it's started well with over 30,000 signatories**, there is an live tally of how many people have signed so you can check it .

Please **boost that number even further**, and put real pressure on Ministers in Europe ahead of the Council meeting on the 20th February when they are going to consider country-by-country reporting.

Thanks
