This was David Cameron's tasteless intervention with reference to me in his Conservative Party speech this morning:

There's an academic called Richard Murphy. He's the Labour Party's new economics guru, and the man behind their plan to print more money.

He gave an interview a few weeks ago. He was very frank. He admitted that Labour's plan would cause a "sterling crisis", but to be fair.....he did add, and I quote, that it "would pass very quickly". Well, that's alright then.

His book is actually called "The Joy of Tax". I've read it. I took it home to show Samantha. It's got 64 positions. And none of them work.

Wow. I hope she's forgiving.

More soon.
