I tend to do a little preparation for most things I do. Here are some questions I thought of for use in 2017.

- * Have you seen a plan?
- * Remind me, what does Brexit mean?
- * What's your problem with parliament?
- * Do you know what the odds of winning in a game of 27 to 1 are?
- * What's great about being out on your own?
- * Tell me precisely which EU regulations you want to get rid of?
- * Have you seen that £350 million a week bonus yet?
- * Precisely what control have you got back?
- * Are you expecting two million UK nationals living in the EU to return home soon?
- * How are you going to decide who you're sending home?
- * Do you know what someone who is forced to leave the country where they live is called?
- * How are you going to make sure the NHS has the nurses it needs when we impose migration controls in 2019?
- * Which UK universities are you happy to see go bust because of a shortage of EU students?
- * Do you know who picks most of the UK's fruit and veg? Who do you think will be doing so in the future?
- * Why are you so keen to deny our young people the chance to live, learn and work abroad?
- * The EU was intended to prevent war ever happening again in Europe. How does leaving help that? What's the plan?
- * How is increased paperwork for every single import and export going to save British business money?
- * How precisely will we be better off when we have to pay tariffs on most things we import?
- * We import more than we export. How are we going to win from tariffs?
- * How are the 30,000 new civil servants working on Brexit cutting red tape?
- * Did you want to encourage Northern Ireland and Scotland to leave the UK?
- * When the City is based in Frankfurt where will you find replacement tax revenues?
- * Did you want the UK to be a tax haven with no chance if you benefitting?
- * What is it that the Australians are going to buy more of from the UK?
- * Where are you going on holiday next year? Expecting a warm welcome?
