

Jersey: rotten to its core

Published: January 13, 2026, 12:07 pm

Jersey [has been found to be at serious fault](#) with regard to child protection failures over many decades.

It is staggering that [Stuart Syvret](#), who spent so long tackling the issue of Jersey's tax abuse had to also expose this issue almost a decade ago, and has suffered badly at the hands of the authorities and even been to prison as a result.

But I am not surprised. I have been a persistent Jersey watcher since 2003. It has not always made me popular there, but I had something important to say and that is that the Jersey government is rotten to its core. It has gone out of its way to assist tax abuse and those seeking financial opacity, but despite all the ongoing warnings made over the last decade children are still apparently at risk in Jersey. What better evidence of the corruption tax haven culture delivers could be there be than that?
