

The growth in personal debt in one chart

Published: January 13, 2026, 1:31 pm

Credit card debt is not, of course, the whole of the personal debt market. But the following chart, [from the FT](#), provides a remarkable insight into the [growth of the personal debt problem](#):

The 2009 crisis and its impact on households is apparent. But things are now much worse. And this debt is subject to penal rates of interest.
