

## The email list

I am aware many people have stopped receiving my daily emails.

I apologise for this. I have no idea why this is the case. I am subscribed and still get them.

I have had my tech team (called Andy) check it out. There is no technical problem we can find.

Might I suggest three things?

- 1) Check they are not going to spam?
- 2) Unsubscribe
- 3) Then resubscribe.

I apologise for having no better solution.
