

## The US Senate votes for extinction

Published: January 16, 2026, 6:09 am

---

The [US Senate voted on the Green New Deal yesterday](#).

All 53 Republicans voted to oppose the Green New Deal.

So did four Democrats.

That's like voting for extinction.

But it does draw lines in the sand that will make choices for young people at future elections in the US easy to identify.

I'm hoping the only actual extinction will be of the Republicans.
