

Carbon insolvency has to be on every large corporate ag...

Published: January 13, 2026, 9:43 am

I [created the concept of carbon insolvency](#) to describe a company that does not know how to raise the funding required to become net-carbon neutral, taking all its activities and customer chain into account. The idea is simple, easy to explain, capable of estimation, and a clear guide to those companies which can, and cannot, survive the change to the sustainable economy that we require. This video explains the concept.
