I did a poll on Twitter yesterday seeking to find out when people thought Johnson might depart as Prime Minister.

This is the result, so far:

The screenshot shows a tweet from Richard Murphy (@RichardJMurphy) with a poll titled "When will Johnson cease to be Prime Minister? A poll:". The poll results are as follows:

Option	Percentage
In the spring of 2021?	61.4%
By the end of 2021?	18%
In 2022?	5%
2024?	15.7%

Additional details from the screenshot: 2,019 votes · 5 hours left, 5:32 PM · Dec 22, 2020 · Twitter Web App, 62 Retweets, 11 Quote Tweets, 36 Likes.

This is not a representative sample, of course.

But I still think it's interesting.
