## Living with Covid is the wrong strategy. Eliminating it...

Published: January 13, 2026, 11:11 am

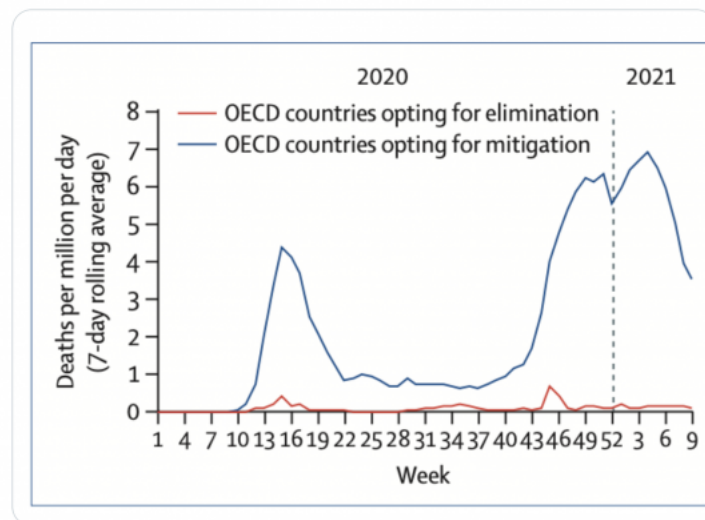

This [Twitter thread](#) speaks for itself. The UK got Covid wrong.

Out today in the Lancet.  
A comparison of countries with eliminationist vs. containment strategies shows that those with a systematic strategy to suppress the virus rather than living with significant levels of virus, do better. They have far less deaths

Replying to @ReicherStephen

Their economies do better (overall, eliminationist countries are now showing growth).
