It's April Fool's day, but the only fools are in the government, who think that the people of this country can be taken for a ride. As the Mirror put it:

There is a cost of living crisis because of the economic exploitation of the shortages

created by Covid, Brexit and war. And the government is compounding it.

The above front page does not even mention the increase in interest rates.

As [I have explained](#), the government could have taken action to prevent many of the cost increases people are suffering and will suffer as this year goes on. Poverty could have been prevented. But they have chosen to make it worse, not better.

It staggers me that anyone could be in, let alone vote for, a government that chooses to impose hunger on people. But that is what this one is doing. And there are people in this country cheering them on.
