[Neil's article](#) begins by saying:

IF there's one document you read today make it 'Surviving 2023' by the acclaimed British economist Richard Murphy. He lays out in stark, almost apocalyptic, language why we're entering an economic ice age and how our paralysed government and political parties should respond. Failure, he warns, means "people will die".

Reviews do not get much clearer than that.

'Surviving 2023' is [available here](#).
