I was amused by this statistic sent to me by Grammarly, which is one of the tools I use in an attempt to cut the number of typos that make an appearance here.

They told me that:

WORDS ANALYZED WITH GRAMMARLY OVER TIME

4,617,268

total words analyzed by Grammarly
since May 26, 2019

That's nearly a million words a year.

And I only use Grammarly for blogging, not my other writing.

I might go and lie down for a moment.....
