

Today's video, now on your favourite podcast channel

Published: January 13, 2026, 3:37 am

This is today's video, which we have put out as a podcast:

https://www.podbean.com/player-v2/?from=embed&i=kdygf-162433c-pb&share=1&download=1&fonts=Arial&skin=1&font-color=&rtl=0&logo_link=&btn-skin=c73a3a&size=150

You should now be able to hear this by clicking the link. It is also on Spotify and many other outlets, with Apple Podcasts being the next we intend to add. Just search for Funding the Future.

My plan is to now embed this audio in all the video posts for those who prefer not to go to YouTube - and we will try to work out why PodBean does not like punctuation by then - why appears to be a syntax issue.
