

The real story about carbon capture and storage

Published: January 12, 2026, 11:49 pm

I think I should share this view on carbon capture and storage. It is not for those offended by swearing, even when it is used appropriately:

This is what Starmer is investing £22 billion in.

Meanwhile, real green infrastructure requirements, from simple things like solar panels onwards, go unfunded.

Now you know why.
